Seeking an internship from April 12 to June 18, 2027

Second-year Computer Science student at IUT de Nantes, I build applications in Kotlin, Java, Python and Go (MVC architecture, unit testing, algorithms) and I am interested in full-stack web development and artificial intelligence. I am looking for an end-of-second-year internship from April 12 to June 18, 2027 to contribute to real-world projects within a development team.

Education

Bsc in Computer Science — Nantes, France
IUT de Nantes, Nantes Université — *2025 – 2028*

Lycée Joliot Curie — Rennes, France
French Baccalauréat – Specializations in Mathematics and Computer Science — *2025*

- Graduated with Honors
- Participated in the Academic Mathematics Olympiad (11th grade)

Lycée français à l'étranger Marguerite Duras — Vietnam
Diplôme National du Brevet (lower secondary school diploma) – Honors — *2022*

Projects

Online Shopping Web Application | *Java, Kotlin, Spring Boot, MariaDB*

- Ongoing development of a dynamic e-commerce web application using Spring Boot and a relational database, deployable on a server
- Gathered requirements from a client (role-play) and carried out UML analysis (use cases, activity diagrams and class diagrams) following an iterative and incremental approach

Flip7 | *Kotlin, JavaFX*

- Designed a card game following an MVC architecture
- Wrote over 300 tests with the JUnit framework to validate the game logic and edge cases

Social Network Analysis and Visualization | *Python*

- Implemented Dijkstra's and Bellman-Ford shortest-path algorithms on a graph modeling a social network, solving all paths in ~9s on a dataset of 200 nodes and 350 edges

2D Particle Simulation | *Golang*

- Implemented a 2D collision detection system in Go
- Optimized collision pair detection using the sweep and prune algorithm, maintaining a stable 60 FPS with more than 20,000 active particles

Personal Portfolio | *HTML, CSS, JavaScript*

- Personal website showcasing my projects (Flip7, a Python platformer game, social network analysis)
- Improved performance by removing unused web fonts and icons and converting media to WebP, raising the Google PageSpeed score from 60 to 79

Experience

Waiter — Summer 2022
Food Service

- Soft skills developed: *customer service, teamwork, versatility, communication under pressure*

Skills

Concepts: Object-Oriented Programming, Data Structures & Algorithms, Databases (SQL Developer), UML Design, Networking Fundamentals, Agile Methods (Scrum, Kanban)
Programming Languages: Python, Golang, Kotlin, SQL, HTML/CSS/JavaScript
Currently Learning : Java, Spring Boot, React, Node.js
Tools & Systems: Git, VSCode, IntelliJ, Linux/Unix
Spoken Languages: Vietnamese (native), English (advanced), Spanish (elementary)
Driving Licence: Category B (France)

Interests

Piano • Badminton • Personal projects: Created a website giving students access to course materials
